AQACell[®] HIDE 6299 na

Opaque Polymer for Architectural Coatings

Reduce formulated cost without impacting opacity

AQACell HIDE 6299 na improves TiO₂ spacing and scatters light, enabling formulators to reach the same level of opacity with less TiO₂. By offsetting TiO₂, AQACell delivers a lower total cost of formulation without compromising performance. Further savings can be gained by using AQACell in conjunction with Acronal[®] PLUS 4670, our state-of-the-art 100% acrylic latex with superior TiO₂ efficiency.

Less TiO₂ needed for the same performance

TiO₂ inefficiency in standard paint formulations
